SUMMARY

Product-minded software engineer with six years of experience building reliable web services and developer tools. Comfortable taking systems from design through production, with a focus on clear interfaces, pragmatic automation, and measurable customer impact.

EXPERIENCE

Senior Software Engineer · Northstar Cloud May 2022 – Present

- Led delivery of a workflow platform used by 40+ internal teams, reducing manual release coordination by 65%.
- Designed TypeScript and Python services on AWS with event-driven pipelines, observability, and role-based access controls.
- Partnered with product and design to ship self-service onboarding, improving first-week activation from 52% to 78%.

Software Engineer · Cedar Labs Aug 2019 – Apr 2022

- Built customer-facing analytics features in React and Go for a B2B SaaS platform serving 12,000+ users.
- Modernized CI/CD and test tooling, cutting median deployment time from 45 minutes to 12 minutes.
- Mentored four early-career engineers and wrote internal engineering guides adopted across the organization.

Software Engineering Intern · Harbor Systems Jun 2018 – Aug 2018

- Implemented API integrations and dashboard components for operations teams using Python, PostgreSQL, and React.

SKILLS

Languages	TypeScript, Python, Go, SQL, JavaScript
Frontend	React, Next.js, HTML, CSS, accessibility
Backend & cloud	AWS, Docker, PostgreSQL, Redis, REST APIs, event-driven systems
Engineering	System design, CI/CD, observability, testing, technical mentorship

EDUCATION

B.S. Computer Science · University of Washington 2015 – 2019

ADDITIONAL

Authorized to work in the United States · Available to start with two weeks' notice · Open to hybrid or remote roles
